BUILT TO ADAPT, ENGINEERED TO PERFORM

Welcome to the Boom Racing Family!

Congratulations on your new BRX01 AWB chassis! You now own a truly extraordinary platform, engineered for adaptability and high performance.

Your Unique Vehicle Identity

Every BRX01 AWB comes with a customized chassis plate and a pair of unique license plates. The chassis plate includes your Vehicle Identification Number (VIN #) and vehicle number, which matches the license plates. Use both numbers to register your chassis and unlock exclusive benefits.

Why Register?

By registering, you'll get access to:

- ✓ Vehicle history and details
- ✓ Factory warranty and replacement parts
- ✓ Exclusive event promotions at Boom Racing events
- ✓ Mileage tracking through Scaletra app

How to Register?

1. Visit BoomRacing.com > Vehicle Registration
2. Log in or create an account.
3. Fill out the vehicle registration form. In the chassis detail section, select the car model BRX01 AWB, and use the vehicle number and VIN number found on the chassis plate.
4. Submit the form. If the details are correct, your vehicle will be registered immediately.

Track Your Adventures with Scaletra

We're excited to partner with **Scaletra Adventure**, the RC tracking app for scale trail enthusiasts. Scaletra lets you log your trail runs, build your virtual RC garage, join challenges, and connect with the community, and more!

As a BRX vehicle owner, you get exclusive benefits:

- Automatically sync your registered vehicles from your Boom Racing account to Scaletra.
- Register new BRX vehicles directly on Scaletra — they'll sync back to your Boom Racing account.
- Add an unlimited number of BRX vehicles to your Scaletra garage.
- Vehicle mileage syncs back to your Boom Racing account.

Thank you for choosing Boom Racing. Now, get out there and commit some badassery!

CHASSIS PLATE

Scan to register your BRX01 AWB

LICENSE PLATE

FRONT AND REAR

A Bolt-On Kit means parts of the chassis are pre-assembled and require minor assembly for completion. The factory assembled parts offer convenience for builders eager to get started. The BRX01 AWB kit includes factory pre-built axles, transmission, transfer case and shocks. Shocks require oil to be filled (included).

⚠ NOT RECOMMENDED FOR CHILDREN UNDER 14 ⚠

THIS CHASSIS KIT IS NOT A TOY. FIRST-TIME BUILDERS SHOULD SEEK ADVICE FROM PEOPLE HAVING BUILDING EXPERIENCE IN ORDER TO ASSEMBLE THE MODEL CORRECTLY. ASSEMBLE THIS KIT ONLY IN PLACES OUT OF CHILDREN'S REACH.

The Scale 4WD Series is Boom Racing's line of scale-based 4WD R/C products geared towards realistic appearance.

BEFORE YOU PROCEED

Congratulations! Owning the BRX01 AWB is a truly special experience.

Carefully read and follow all instructions to prevent serious damage to your model. Failure to follow these instructions will be considered abuse and/or neglect.

Study the instructions thoroughly before assembly.

There are many small screws, nuts and similar parts. Assemble them carefully referring to the drawings. Follow the steps exactly as shown to build the vehicle correctly without issues.

If you decide to return the BRX01 AWB, do not begin assembly. Your hobby dealer will not accept a model for return or exchange after you have started assembly.

Boom Racing offers Spare Parts & Upgrade Options for improved performance. Visit our website (<https://www.enjoybeingabadass.com>) or your local Boom Racing dealer for assistance. Please note that specifications, availability and price are subject to change without notice.

SAFETY PRECAUTIONS

All of us here at Boom Racing want you to enjoy your new vehicle. Operate your BRX01-AWB sensibly and with care, and it will be exciting, safe and fun for you and those around you. Failure to operate your BRX01 AWB in a safe and responsible manner may cause damage and injury and void your warranty.

Follow these outlined rules for safe radio control operation

- Read carefully and fully understand the instructions before assembly.
- ***This model is not intended for use by children (minors) under 14 years of age without the supervision of a responsible and knowledgeable adult who should also read the instructions.***
- When assembling this kit, extra care should be taken to avoid personal injury. Keep out of reach of small children.
- Avoid running the vehicle in crowded areas and near small children.
- BRX01 AWB can be very fast and quiet. It could cause injury to those unaware of its presence.

Inspect Your BRX01 AWB Before and After Operation

- Make sure that all screws and nuts are properly tightened.
- Use thread lock on screws for any metal on metal surface.
- Adjust steering servo and trim so that the BRX01 AWB runs straight with transmitter in neutral.
- Disconnect/remove all batteries after operation.
- Replace any batteries that have been dented, are bloated, or have frayed wires, short circuits can cause fire.
- Completely remove sand, mud, dirt etc after use to prolong the life of the BRX01 AWB.
- Maintain bearings by cleaning or replacing them regularly.

WARRANTY

Boom Racing's One (1) Year Factory Limited Warranty – A Peace Of Mind Right From The Start

WHO IS COVERED

This warranty is extended to the original end-user that registers it online (<https://www.boomracing.com/vehicleregistration>) only, whether purchased or received as a gift.

FACTORY LIMITED WARRANTY

What Is Covered and For How Long

Boom Racing warrants that all new products are free from defects in manufacturing, materials and workmanship for a period of one (1) year from date of retail purchase. The receipt or invoice at the time of purchase is your proof of purchase and is required for Boom Racing to honor any warranty.

What Is Not Covered

It does not cover defects or malfunction caused by user error of assembly, damages due to normal wear and tear, failure to follow operating instructions, misuse or abuse, users' failure to perform routine maintenance, or use with products with which is not intended to be used. It also does not cover damages caused by unauthorized alteration, modification or repair. It does not cover cosmetic or incidental damages. Boom Racing does not warrant or provide service or support for any third party products.

The JX mini servo warranty will be void if it is disassembled.

What We Will Do

We will, at our discretion, repair or replace any product free of charge that is incorrectly made or proves to be defective in material or workmanship during the warranty period. If your product is no longer being manufactured or is out of stock, we may replace your product with a comparable or improved product at our option.

What We Will Not Do

We will not pay for shipping, insurance or transportation charges from you to us, or any import fees, duties and taxes.

What To Do To Obtain Warranty Service

To obtain warranty service for products purchased from a third-party, retail or directly from Boom Racing you must return the product with proof of purchase using the following procedures:

1. Contact Boom Racing Customer Support for specific warranty instructions via our website, by email, telephone, or our social media accounts:
 - Online @: <https://www.boomracing.com/contact-us>
 - Email: sales@boomracing.com
 - Facebook Messenger: (www.facebook.com/boomracingrc) or Instagram: DM @boom_racing

You may be asked to complete a warranty service request form. A copy of your purchase receipt may be required.
2. Our Customer Support may ask you to return and ship the defective product back to us. Label and ship the product, freight prepaid, to the address provided by Boom Racing; and
3. Place any necessary return authorization number prominently on the outside of the return packaging. Return packaging not bearing a return authorization number where required may be refused.

Boom Racing reserves the right to final decision, change or modify this warranty without notice.

 Fit the Spur Gear Mount onto the Spur Gear by tightening M2x5 countersunk screws.

To install or remove the spur gear from the gearbox, align the spur gear as pictured and temporarily insert two M3 screws** to act as stoppers.

*To install the spur gear, install the four M2x5 screws, then the center M2.5x8 screw.
*To remove the spur gear, remove the M2.5x8 screw, then remove the four M2x5 screws.
** If the spur gear can't be removed, place two long M3 screws and torque them both until the gear is released.

INSTALLING THE SHIFT ROD & CONFIGURING THE SHIFT SERVO

1. Attach the shift rod to the servo saver first, then connect it to the gearbox as illustrated in the diagram.
2. Temporarily connect the electronics. Choose a channel with a two-position switch and plug the shift servo into that channel.
3. With the servo connected, lower the EPA (End Point Adjustment) on both sides initially. Test the servo's rotation direction: counterclockwise shifts to first gear, and clockwise shifts to second gear (see diagram for reference).
4. Ensure the shift servo is set to the first gear position and the shift rod on the gearbox is fully extended outward. If it's not fully out (it should extend approximately 16mm), rotate the wheels slightly to adjust.
5. Once these steps are complete, secure the servo saver to the shift servo. Then, adjust the EPA settings to fine-tune the shifting, ensuring smooth transitions into both first and second gears.

* Note: Failure to setup the shift servo properly may cause the shift servo to malfunction or not shift into gear properly.

DIAGRAM 12.1

Servo horn position for the 1st gear. Servo horn position for the 2nd gear.

 Wheelbase 285-325 / 11.2"-12.8" **#BRKD003-116**

PRE-ASSEMBLED AXLE

Front Diff Cover Release Method In Case Assembly Is Tight.

Step 1 - Loosen four M2.5x16mm socket screws indicated making the screw cap 3 mm apart from the case.

Step 2 - Hammer those screw slightly via screwdriver to release the front diff cover.

The Third Member Release Method When Assembly Is Tight.

Step 1 - Remove all M2.5x16mm and two M2.5x5mm socket screws

Step 2 - Install two M2.5x16mm socket screws into both left and right screw holes as indicated

Step 3 - Lightly torque the screws until the third member is released

PRE-ASSEMBLED FRONT AXLE

  Apply a generous amount of Black Grease on all movable contact surfaces including gears, spacers, shafts and bearings.

Adam Sajdak (Germany)

The BRX01 AWB is a very successful chassis design that works great off-road! At the same time, thanks to the adjustable wheelbase (AWB), it gives us unlimited possibilities in the future, allowing us to adapt the frame to individual projects. It looks like a great multiplatform that will work in any project.

Jeremy Kilburn (United States)

Another unmatched build experience from Boom Racing! The quality and thoughtfulness of the AWB kit presents unlimited possibilities with builders, competitors and newcomers in mind.

Shawn Roche (United States)

I have tested all the BRX trucks and I was excited to get involved with the AWB because it is the chassis the industry has needed for a very long time. Based on the tried a true BRX01 drivetrain it is reliable and it out performs any stock leaf truck I have ever run, this is the perfect chassis for a builder or anyone looking for something different and still want insane performance. Excellent job Boom Racing.

Andreas Hahn, Stefan Dölderer (Austria)

Thank you for the opportunity to test this model in detail. First of all, the quality is, as always, very high and building the AWB model is fun. Thanks to the adjustable chassis, you will have many options for driving different bodies in the future. The quality of the adjustment mechanism is very good. The rest is tried and tested BRX01 technology which, as everyone knows, is perfect.

Matthew Maynard (United States)

My journey with Boom Racing began with the pre-order of the BRX02 carbon fiber chassis kit. From the moment I held it, I knew this was an amazing company. Over the years, as I built more trucks, my trust in their quality and professionalism only grew, both in their rigs and customer service. Now, I have the honor of standing in a Boom tent, talking tiny trucks, and helping bring exciting new kits to the RC market. Whether at events or online, I'm proud to be part of this incredible community. Congrats - if you're reading this, you're now part of the Boom family. Welcome, and enjoy committing badassery!

Peter Gray (United Kingdom)

Building and then running the BRX01 AWB has been an eye opener. It's made me realise why I love this aspect of the hobby so much. A photorealistic body combined with a chassis, transmission and tyre choice that punches well above its wheelbase and wheel size. Add to that the game changing adjustability of the wheelbase via the AWB Chassis and you have a rig that I'm convinced will inspire many a custom build globally... (hell, I'm already planning something myself!)

Darius Cybula (Germany)

Chassis of new possibilities. The ability to adjust the wheelbase to individual needs gives freedom of choice of bodywork, and the ease with which it can be done even encourages it. All this combined with proven solutions, already known in the BRX01 chassis. I am convinced that it will soon become the most frequently purchased chassis among hobbyists of both scale and performance cars.
