5.

6.

Turn the Shift Rod Bushing clockwise to lock.

7.

Adjust the T-Grip clockwise to make the handle position horizontally.

8.

If the transmission on the chassis has been previously installed, detach the drive shafts and remove both the gearbox and the transfer case from the chassis.

Carefully remove the Guiding Shaft(*) in an upward direction to prevent misalignment between the spacers and the input gear inside the transfer case before engaging the new transfer case with the gearbox. Then proceed to re-install the unit onto the chassis.
